“ I never knew him, but somehow we had so much in common. I purchased a painting of his at an auction, because as both a car lover and an artist, I immediately fell in love with the piece. Every single brushstroke was intentional, and not a single one out of place. I decided to do some research and found that we both lived in Cadillac, both had a passion for photography, fine art, and most importantly cars (Ford's to be specific). Robert Sirois lived his life to the fullest, and he lived his life almost exactly how I hope to live mine. His painting will be proudly displayed as is, without a frame, to showcase each measurement, his math, and all of his color tests around the boarder of the drawing board (where the frame or matt would normally cover), because as an artist I truly appreciate the human element shown by using the same board for all the testing and math. His influence is still reaching new people. Kids like me.
